SRI SAI GROUP · HRMS PLATFORM

HRMS Workflow Guide

Every workflow and feature in the system, explained for the people who use it. Organised by who you are: Employee, Brand / Company Admin, Group Admin and Super Admin.

Employee | Brand / Company Admin | Group Admin | Super Admin

Edition: 21 October 2026

CONTENTS

1 How the organisation is structured

2 For everyone: sign-in, password, notifications

3 Employee (Self-Service)

4 Brand / Company Admin

5 Group Admin

6 Super Admin

7 HR: HR Manager and assigned HR

8 Face ID and the attendance kiosk

9 Roster and the queue system

10 Payroll in detail

11 Powers and who can give them

12 Leave Types, Policies and balances

13 Comp-Off in detail

14 Holidays, Shifts and Company Policies

15 Employee documents

16 Employee lifecycle and accounts

17 Approval rules, history and revert

18 Reports and exports

19 Dashboards and main screens

20 Every notification

21 Automatic tasks

22 Coming next and current limits

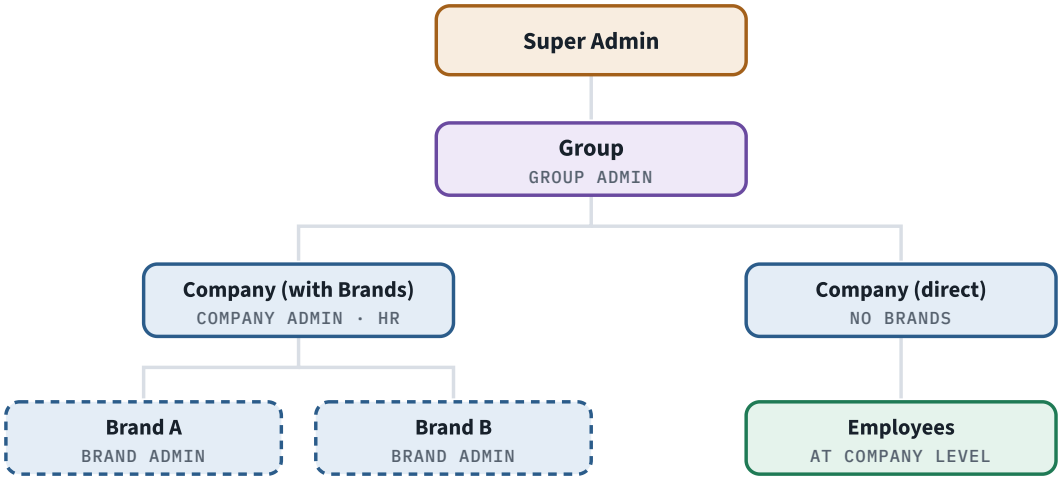

23 Glossary

24 Who can do what

CHAPTER 1

How the organisation is structured

The system follows the real shape of the business. Each level is created only by the Super Admin, together with that level's first admin.

Each Brand holds its own employees, departments and rosters

Group

A family of companies (for example, Sri Sai Group). A Group Admin oversees every company inside it.

Company

A legal business. When it is created, the Super Admin chooses whether it works through Brands or directly. This choice is fixed.

Brand (optional)

A unit or outlet inside a Company. Each Brand can have its own Brand Admin who looks after only that Brand.

Department & Designation

What a person does (Sales, Accounts; Executive, Manager). Separate from the Brand, which says where they work.

Roster

A bundle that gives a set of employees their shift, holidays, company policies and leave policy in one go.

Employee

Belongs to a Brand (or directly to the Company), a Department, a Designation and, once assigned, a Roster.

CHAPTER 2 · ALL USERS

For everyone: sign-in, password and notifications

These work the same way in every portal.

Getting your account

ADMIN Creates your record and sends an invite → **SYSTEM** Emails you a one-time activation link →

YOU Open the link and set your own password → **DONE** Sign in and land on your own portal

No password is ever sent by email. Passwords need at least 8 characters with a letter and a number.

Sign in

One login page for everyone. The system takes you straight to the right portal for your role.

Stay signed in

Close the tab and come back later; you are signed back in automatically until the session expires.

Forgot password

Enter your email, get a reset link valid for 10 minutes. Resetting signs you out on every other device.

Change password

Settings → enter your current password and a new one.

Notification bell

Top bar. Blinks when something is waiting. Click a notification to jump straight to the request it is about.

Mark as read

Click one to read it, or use "Mark all read". Unread items are highlighted.

CHAPTER 3 · EMPLOYEE SELF-SERVICE

Employee

Your own attendance, leave, salary and requests, from a computer or a phone. On a phone, a bottom bar gives quick access to Dashboard, Requests, Calendar, Salary and Profile.

Dashboard

Today's status, leave balances, pending requests and any extra responsibilities you have been given.

My Attendance

Month calendar and history of every day: check-in and check-out times, hours worked, status.

Leave Balance

Each leave type you are entitled to: allotted, carried forward, used and remaining.

My Leave

Apply for leave (full or half day), see status, cancel a pending one.

My OD

Apply for On Duty when working outside the office, so the day counts as worked.

My Comp-Off

Days earned by working on a holiday or weekly off, and when they expire.

Resignation

Submit or withdraw your resignation and track its decision.

My Salary

Monthly in-hand pay, deductions, bonuses, and the payslip PDF once it has been shared with you.

Team Approvals

If people report to you: approve or reject their leave, OD and comp-off.

Holidays & Policies

The year's holiday list and the company policies that apply to you.

My Profile

Your details, department, designation, manager. Changes are made by HR.

Settings → Face ID

Register your face once so you can mark attendance at the office kiosk.

Marking attendance with your face

Attendance is marked only at the office kiosk, using face recognition. There is no phone, QR or GPS punch.

One-time: register your Face ID

YOU
ESS → Settings → Face ID
→
YOU
Take 3 photos: front, left, right
→
SYSTEM
Checks the 3 photos are the same person
→
DONE
You can now use any kiosk in your Group

Every day: check in and check out at the kiosk

YOU
Tap Check-In or Check-Out
→
KIOSK
Asks a random action: blink, or turn your head left / right
→
YOU
Do the action in front of the camera
→
SYSTEM
Confirms you are live and finds your face

RECOGNISED
Attendance is saved with the time and the office location. A short clip is kept for audit.

NOT RECOGNISED / FAILED
No punch is recorded. Raise a regularisation request for that day instead.

Night shifts: the day counts as the day your shift started. Check-out must happen within 12 hours 30 minutes of check-in; after that the day is marked "Missed Checkout" and you fix it through regularisation. Your next punch starts a fresh check-in.

Fixing a wrong or missing punch (Regularisation)

YOU
My Attendance → pick the date → Request change
→
YOU
Enter correct times and a reason
→
SYSTEM
Notifies your admins
→
ADMIN
Approves or rejects (with reason)
→
RESULT
Day is corrected; salary recalculates if already generated

Leave

Applying for leave

YOU
My Leave → Apply: type, dates, full / half day, reason

→

SYSTEM
Counts working days only (skips holidays, weekly offs) and checks balance

→

SYSTEM
Notifies your manager(s) and admins

→

APPROVERS
Every assigned manager must approve; an admin can decide directly

APPROVED
Balance is reduced, the days show as leave in attendance, you get a notification.

REJECTED
You see the reason. The balance is untouched.

Unpaid leave (LWP) is allowed even with zero balance and reduces salary. You can cancel a request while it is still pending; your approvers are told.

Sandwich rule. If your company has it switched on, the holidays or weekly offs that fall between two full-day leaves are also counted as leave (or as loss of pay if no balance is left). Cancelling either leave gives those days back.

Leave year, probation and confirmation

JOINING
On Probation / Intern: one leave period from the date of joining

→

HR
Queues the Roster you will move to after probation

→

SYSTEM
Day after probation ends: becomes Full-time, switches Roster

→

CONFIRMED
Leave runs by yearly cycle; unused leave carries forward up to the limit

If no next Roster is queued, nothing changes automatically; HR gets reminders. The yearly cycle is January–December unless the company sets another start month.

On Duty (OD)

Apply with date and reason when working away from office. Approved OD counts as a worked day, with the shift's hours.

Comp-Off

Worked on a holiday or weekly off while enrolled in a comp-off policy? A credit is created automatically and sent for approval. Use it by applying leave of type Comp-Off; the oldest credit is used first. Unused credits expire after the policy's limit.

Resignation

YOU
Resignation → submit with reason and proposed last day

→

SYSTEM
Notifies your managers, your assigned HR and admins (dashboard + email)

→

ASSIGNED HR
Only they accept or reject

ACCEPTED

You move to "On Notice" with a confirmed last working day. Final salary is settled up to that day.

REJECTED

You receive the reason by notification and email.

You can withdraw before a decision. If no HR is assigned yet, the request waits and the HR is notified once assigned.

Salary and payslips

MONTH ENDS
Salary is generated from attendance and leave

→

PAYROLL TEAM
Reviews and shares payslips

→

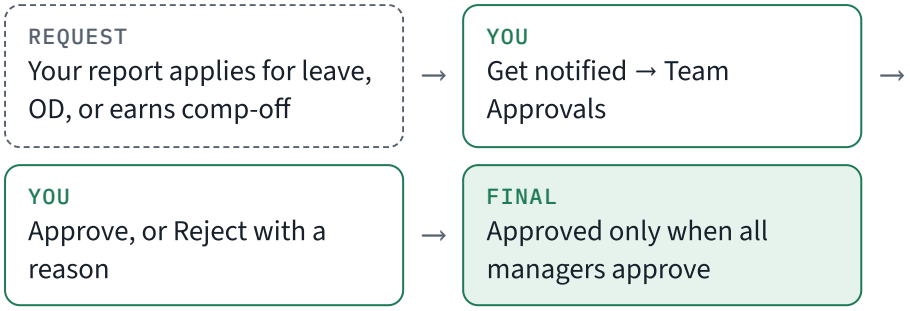

YOU
My Salary: see breakdown, download PDF

A month stays hidden until it is shared. If attendance or leave is corrected later, the month is recalculated and you are notified; the difference is paid or recovered in the next month as arrears.

If people report to you (Manager)

A manager is any employee chosen as someone's manager. Managers can be in any company or brand of the same Group. An employee can have more than one manager.

Team Approvals

Any manager's rejection rejects the request. Each request has a History view showing who decided what and when.

CHAPTER 4 · COMPANY ADMIN, HR MANAGER, BRAND ADMIN

Brand / Company Admin

Company Admin and HR Manager run the whole company. A Brand Admin has the same tools but sees and changes only their own Brand's employees and records. Shifts, Departments and Designations are shared across the company.

Dashboard
Employee count, brands, and pending approvals at a glance.

Employees
Add, edit, transfer, invite to Self-Service, documents, powers, managers, HR, Face ID photo.

Organization
Departments and Designations. Company Admin sees Brands (created by Super Admin).

Shifts
Create shifts with timings and weekly offs. Night shifts are detected from the hours.

Roster
Bundle shift, holidays, policies and leave policy; assign employees in bulk; publish.

Approvals
Leave, OD, Regularisation, Comp-Off. Approve, reject with reason, revert, view history.

Resignations
View all resignations and their status. Decision is made by the employee's assigned HR.

Attendance Records
Day-wise list of punches with filters; change status in bulk; view audit clip.

Attendance Board
Month grid of every employee and day; Excel export with payroll cross-check columns.

Monthly Report
Pick employees and months; one combined report with attendance, leave balances and pay.

Holidays
Yearly holiday list, can be region-specific through Rosters.

Leave Types & Policy
Define leave types; set allotment, accrual, carry-forward limit and yearly cycle month.

Company Policies
Publish policies with text and an attachment for employees to read.

Comp-Off Setting
Create comp-off policies (e.g. 90-day expiry) and assign them to employees in bulk.

Payroll

Manage payroll for your own company (Company Admin / HR Manager: company + its Brands) or your own Brand (Brand Admin): templates, salaries, bonuses, monthly payroll, sharing payslips. Ask the level above to release employees whose salary it set. See Chapter 10.

Settings

Company profile and your password.

Setting up a company, first time

1 Departments & Designations → 2 Shifts with weekly offs → 3 Holidays, Leave Types, Leave Policy, Company Policies →

4 Roster: link shift, holidays, policies, leave policy → 5 Add employees and assign them to the Roster →

6 Invite employees to Self-Service

Employees can be added before any Roster exists; assign the Roster later. Until then they follow their default shift.

Onboarding an employee

ADMIN Employees → Add: details, Brand, Department, Designation, type, probation, work state → ADMIN Choose managers and assigned HR (any company of the Group) →

ADMIN Optional: give extra powers → ADMIN Upload and verify documents → ADMIN Send Self-Service invite → employee activates

Transfer

Move an employee to another Department, Brand or to company level. A Brand Admin can change Department only.

Bulk Assign HR

Select many employees and set their assigned HR in one step.

Face ID photo

View the photo an employee registered, for verification.

Leaves tab

Adjust an employee's leave balance by hand.

Approving a request (Leave / OD / Regularisation / Comp-Off)

NOTIFICATION
New request arrives

→

ADMIN
Approvals → open the tab

→

ADMIN
Approve, or Reject with a mandatory reason

→

SYSTEM
Records it in History, notifies the employee

→

PAYROLL
If the month was generated, it recalculates automatically

An admin's decision applies straight away, without waiting for managers.
Decisions can be reverted; salary is corrected through arrears.

Monthly attendance check before payroll

1
Attendance Board: review the month

→

2
Clear pending regularisations and leave

→

3
Fix statuses in Attendance Records

→

4
Export Excel: payable days, LOP days and difference vs payroll

CHAPTER 5 · GROUP ADMIN

Group Admin

Sees every company in the Group, can manage payroll for any of them (and override what a company or Brand set), and can approve requests in any of its companies.

Dashboard

Totals across all companies of the Group.

Companies

Open any company: employees, approvals, company policies. Employee pop-up includes a Powers tab.

Approvals

Approve, reject or revert leave, OD, regularisation and comp-off in any company.

Attendance Records & Board

"All Companies" view grouped by Company › Brand, or filter one company. Excel export. View only.

Monthly Report

Pick employees across companies and any months; combined report.

Payroll

Full control over every company and Brand: templates, salaries, bonuses, monthly payroll, sharing payslips, and deciding salary release requests.

Group-level powers

Only a Group Admin can give an employee a power that works across all companies.

Settings

Your password.

Payroll, end to end

Payroll can be set up by the Group, by each Company and by each Brand, and then runs every month on its own. The short version is below; Chapter 10 has every rule, rate and example, including the three levels.

Set up (once)

1 · TEMPLATE
Basic % of CTC, HRA % of Basic, Special = balance

→

2 · DEDUCTIONS
Turn on PF, ESI, PT, LWF, TDS and employer shares; edit rates

→

3 · EXTRA ITEMS
Allowances or deductions for chosen employees only

→

4 · ASSIGN
Template + CTC (monthly or yearly) per employee, or in bulk

A preview shows gross, deductions and in-hand before saving. "No deductions" makes in-hand equal to CTC for that employee. A salary revision starts a new version from its date; old months keep their figures.

Every month

AFTER MONTH END
System generates each employee's salary

→

PAID DAYS
Present, OD, half-day, paid leave, holidays, weekly offs

→

LOSS OF PAY
Unpaid leave, absent days, sandwich days

→

PAYROLL MANAGER
Reviews Monthly Payroll

→

SHARE
"Share with all" or selected rows → employees notified

Days before joining or after the last working day are not paid and are not counted as loss of pay. A shared payslip can be hidden again with "Stop sharing".

Bonuses & one-time pay

Bonus, incentive, overtime, reimbursement. Fixed amount or % of Basic / Gross / CTC. For many employees and many months at once. Paid in full, taxable if marked.

Month-limited items

An allowance or deduction can apply only in chosen months (e.g. festival allowance in October).

Corrections & arrears

Any later change to attendance, leave, OD or bonus recalculates the month. The difference is added or recovered next month.

Final settlement

End a salary with the last working day. That month's salary is generated right away, paid up to that date. Marked "Final".

Working as another company

HOLDER
Has a Group-level power

→

HOLDER
Picks a company in the top-bar Company Switcher

→

RESULT
Uses only that power's pages for the chosen company

Personal pages (My Leave, My Salary) are hidden while acting for another company.

CHAPTER 6 · PLATFORM OWNER

Super Admin

Creates the organisation structure and the first admin at every level, and manages the office kiosks.

Dashboard

Groups, companies and users across the platform.

Companies

Group → Company → Brand tree. Create and edit each level; add rosters and employees.

Users

Directory of every user, with employee details and powers.

Attendance Kiosks

Create kiosk accounts per Group with their office locations; sign devices out remotely.

Settings

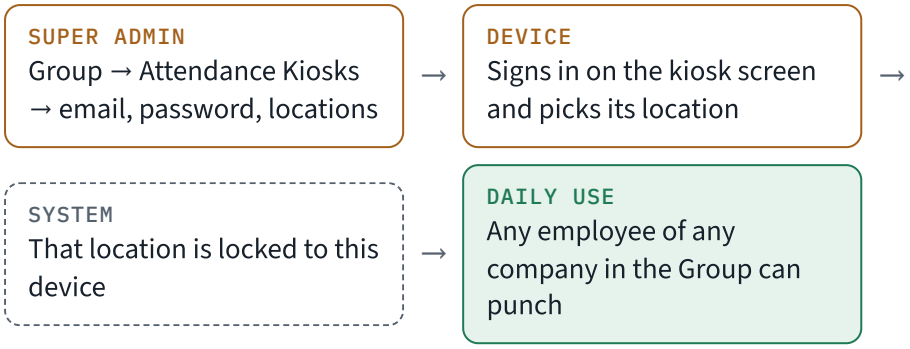

Your password.

Bringing a new business on board

1. Create Group → invite Group Admin
2. Create Company: choose "with Brands" or "direct" → invite Company Admin
3. With Brands: create each Brand → invite Brand Admin
4. Create kiosk account for the Group with its locations
5. Admins set up their company (Chapter 4)

Every invited admin receives an activation email and sets their own password.

Office kiosk lifecycle

One account covers all locations of a Group; two devices can never run as the same location. A device that stays silent for 3 minutes frees its location. From "Signed-in Devices", the Super Admin can sign out one location or all devices.

CHAPTER 7 · HR

HR: HR Manager and assigned HR

"HR" means two different things in the system. The **HR Manager** is a role, like Company Admin. The **assigned HR** is a person chosen on each employee's record, who looks after that employee's resignation.

	HR Manager (role)	Assigned HR (per employee)
Who	A login given the HR Manager role for a company	Any employee chosen in the "HR" field of another employee's record
Reach	The whole company, all Brands	Only the employees they are assigned to
Where they can sit	Inside the company	Any company or Brand of the same Group
What they do	Everything a Company Admin does: employees, organisation, shifts, rosters, approvals, attendance, reports, leave setup, policies, comp-off settings, giving powers (Brand / Company level)	Accept or reject the resignation of the employees assigned to them. Nothing else changes for them.
Resignations	View only	The only person who decides
Payroll	Manage (company + its Brands), same as Company Admin	No extra access

Assigning HR to employees

ADMIN
Employees → open an employee → HR field

→

ADMIN
Pick Company / Brand first, then the person

→

SAVED
That person is now this employee's HR

BULK

Employees list → select many → "Assign HR" sets the same HR for all of them at once.

RULES

The HR must be in the same Group. An employee can never be their own HR. A person can be both manager and HR; they then get both sets of rights.

Resignation, from the HR side

EMPLOYEE
Submits resignation with reason and requested last day

→

SYSTEM
Notifies HR, managers, Company Admin, HR Manager, Brand Admin (dashboard + email)

→

ASSIGNED HR
Team view → opens the request

→

ASSIGNED HR
Accept (can set the final last working day) or Reject (reason required)

→

SYSTEM
Employee notified by dashboard + email; decision kept in history

AFTER ACCEPT

Employee status becomes "On Notice". Salary is paid only up to the last working day; that month is settled as a final salary.

NO HR ASSIGNED

The resignation is still submitted and waits. The moment an admin assigns an HR, that HR is notified.

Emails show the employee's name as sender, and replying goes straight to the employee (or to the HR, for the decision email). The employee can withdraw any time before a decision.

Probation reminders

From 3 days before a Probation / Intern period ends, the employee, their managers and the admins who can edit them get a daily reminder, and a pop-up at login, until the employee is confirmed.

Document verification

Employees upload documents; HR checks and marks them verified. Can be delegated as a power.

Self-Service invites

HR sends the activation email that gives an employee their own login.

Leave balances

HR can adjust any employee's balance by hand from the employee's Leaves tab.

CHAPTER 8 · ATTENDANCE IDENTITY

Face ID and the attendance kiosk

Attendance used to be marked by scanning a QR code with a phone. That system has been **retired**. Every employee is now identified by their own face at an office kiosk. There is no QR, phone, fingerprint or GPS punch.

	Old: QR	Now: Face ID
What the employee needs	Their phone, registered once	Only their face, registered once
At the office	Scan a rotating QR on a screen	Stand in front of the kiosk camera
Proof it is really them	Phone lock screen	Live action on camera (blink / head turn) + face match
Kiosks	One terminal per Brand	One kiosk account per Group, many named locations

Step 1 · Super Admin sets up the kiosk

SUPER ADMIN
Group → Attendance Kiosks → Add

→

SUPER ADMIN
Email, password, and location names (e.g. "Head Office", "Warehouse")

→

KIOSK DEVICE
Opens the kiosk page, signs in, picks its location

→

READY
The location is locked to that device

The location list shows only places no other device is using. A device that goes silent for 3 minutes frees its location. Super Admin can see every device's status and sign out one location or all of them from "Signed-in Devices".

Step 2 · Employee registers Face ID (once)

EMPLOYEE
Self-Service → Settings → Face ID

→

EMPLOYEE
Allows the camera and takes 3 photos: front, turned left, turned right

→

SYSTEM
Checks all 3 are the same face, saves them

→

DONE
Works at every kiosk of the Group, in any company

Company Admin, HR and Brand Admin can open the employee's record and view the registered Face ID photo to confirm it is the right person.

Step 3 · Daily check-in / check-out

EMPLOYEE
Taps Check-In or Check-Out

→

KIOSK
Shows a random challenge: Blink, Turn left, or Turn right

→

EMPLOYEE
Does it within about 2–3 seconds

→

SYSTEM
Confirms a live person, then searches every employee in the Group

→

SAVED
Name and time shown; location and a short audit clip kept

What the kiosk says	Why	What to do
No face found	Face not visible, too dark, too far	Stand closer, face the camera, try again
Liveness failed	The challenge wasn't done, or a photo was shown	Try again and do the action clearly
Not recognised	No registered face matches closely enough	Register Face ID; meanwhile raise a regularisation
Not sure who you are	Two registered people look too alike	Try again; HR can ask for a fresh registration
Checkout window expired	More than 12 h 30 min since check-in	Day marked Missed Checkout; raise a regularisation. Next tap is a new check-in
Location lost / signed out	Another device took the location, or Super Admin signed it out	Sign in again and pick a location

Night shifts

The day belongs to the date the shift started. Arriving at 00:30 for a 21:00–06:00 shift still counts for the previous day.

Early checkout

Checking out before the shift's length is complete shows a warning before the punch is saved.

Working hours

Both punches = actual hours. On Duty or a missed checkout = the shift's length, marked " (shift)".

Where it shows

My Attendance for the employee; Attendance Records and Board for admins, with the audit clip.

CHAPTER 9 · ROSTER

Roster and the queue system

A Roster is the one place that decides an employee's working rules. Put an employee in a Roster and they get its shift, holidays, policies and leave entitlement together.

Shift

Timings and weekly offs. Decides working days and the hours expected.

Holidays

Region-specific holiday lists: a Mumbai roster and a Delhi roster can have different holidays.

Company Policies

Which policies the employee sees.

Leave Policy

Which leave types the employee gets, how many days, monthly or yearly accrual, carry-forward limit.

Week Off Leaves (optional)

For a shift with no fixed weekly off: employees get a monthly allowance of week-off days to take as leave, based on the days chosen.

Brand

A Roster can belong to one Brand or the whole company. Employees can only join a Roster of their own Brand or a company-wide one.

Building a Roster

1. Roster → Create (name, optional Brand)
2. Shifts page → edit a shift → "Assign to Roster(s)"
3. Same from Holidays, Company Policies and Leave Policy pages
4. Assign employees (bulk select)
5. Roster detail shows everything linked

A Roster can't be deleted while it still has employees or anything linked. Rosters never expire. Employees can be onboarded with no Roster; they follow their default shift until one is assigned.

Changing an employee's Roster by hand

ADMIN
Employee → Change Roster → pick the new one

→

ADMIN
Chooses: carry leave forward, or start fresh

CARRY FORWARD

Leave types both Rosters share keep their remaining balance. A type the new Roster doesn't have moves into a "Carry Forward – <type>" balance, capped at that type's carry-forward limit, so nothing is lost.

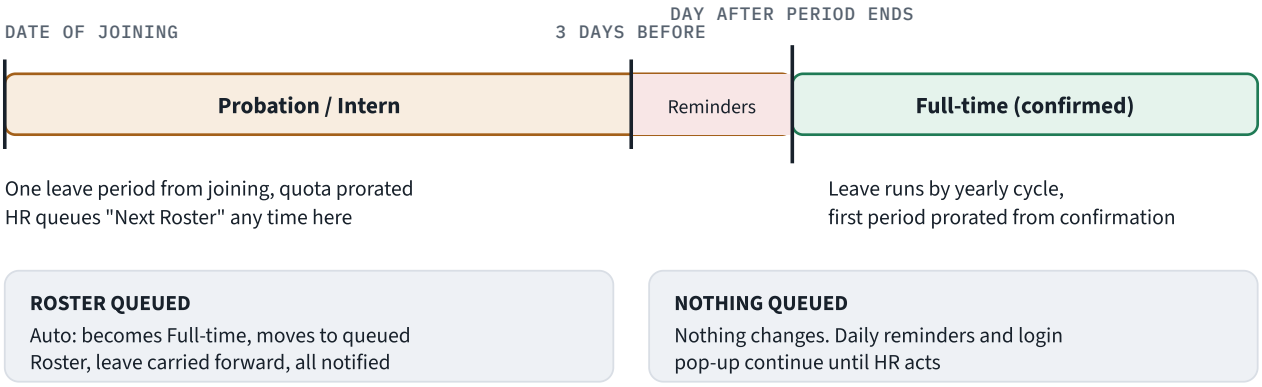

START FRESH

Every balance is reset to what the new Roster gives. Types the new Roster doesn't have go to zero.

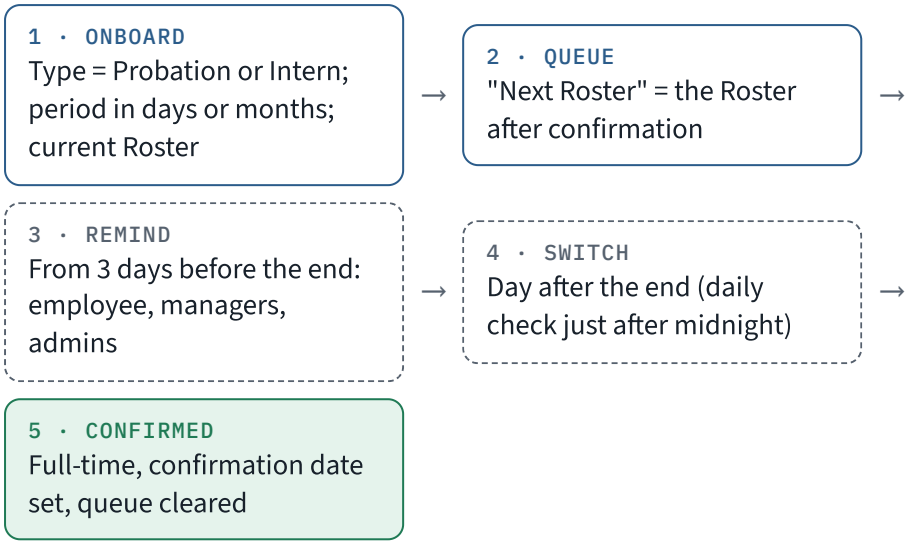

Every change is recorded in the employee's roster history: from, to, who, when.

The queue: Probation / Intern → Full-time

New joiners often start on a probation Roster and move to a regular one later. Instead of someone remembering to do it, HR queues the next Roster in advance and the system makes the switch on the right day.

Queue workflow, step by step

What happens at the switch	Detail
Employment type	Probation / Intern → Full-time; "Confirmed on" = switch date
Roster	Moves to the queued Roster, using the carry-forward option
Probation leave	The single probation leave period closes the day before confirmation
New leave	Each leave type of the new Roster starts a period from confirmation to the end of the yearly cycle, prorated, plus the probation remainder (capped by the carry-forward limit)
Notifications	Employee, managers and admins are told

Manual confirmation

An admin changing the type from Probation / Intern to Full-time by hand triggers the same confirmation immediately.

Back-dated joining

If a period has already ended when the employee is saved, the switch happens right away.

Long probation

Probation leave never renews on the cycle date, however long the period runs.

Yearly cycle

Company default is January–December; another start month can be set on Leave Policy Settings, or per employee.

Example. Riya joins 1 March on a 3-month probation in "Trainee Roster". HR queues "Store Staff Roster". From 29 May she and her manager get reminders. On 1 June she becomes Full-time in Store Staff Roster; her unused probation leave carries forward and she gets a prorated June–December allotment. Had nothing been queued, she would stay a Trainee and reminders would continue daily.

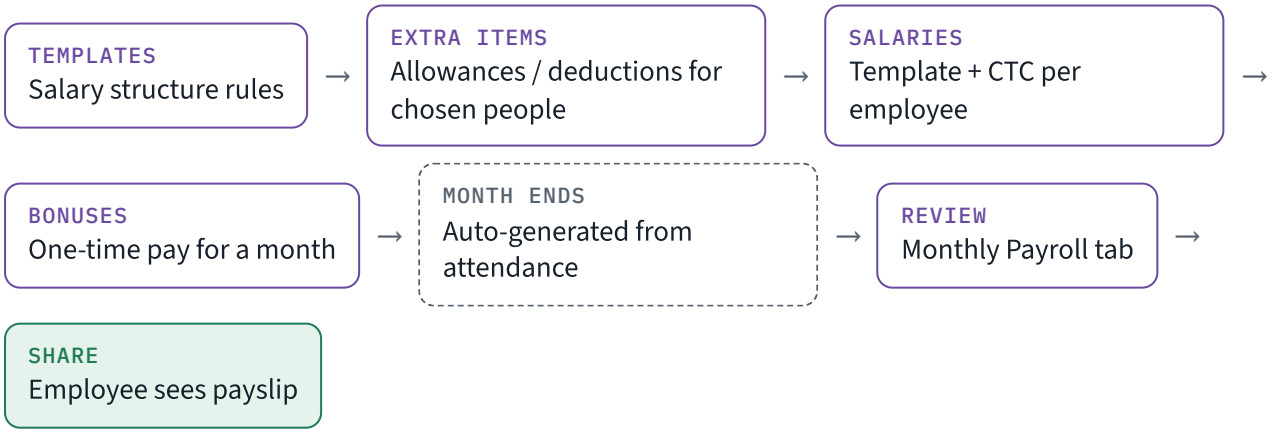

CHAPTER 10 · PAYROLL

Payroll in detail

Payroll can be managed at three levels: the Group, each Company and each Brand. Salary is worked out from a template and the employee's CTC, adjusted by that month's attendance and leave, and shared with the employee only after review.

Who	What they can do in Payroll
Group Admin	Everything, for every company and Brand: templates, extra items, salary assignment, bonuses, monthly payroll, sharing payslips, final settlement. Can override anything a Company or Brand set
Company Admin / HR Manager	The same tools for their own company and all its Brands
Brand Admin	The same tools for their own Brand only
Employee with "Manage Payroll" power	Same as an admin of the level it was given at: Brand, Company or Group
Employee	My Salary: their own months, once shared

The whole cycle

Three levels: who sees and edits what

Every template and extra item belongs to the level that made it. You see your own level's and the levels above yours; you can edit your own level's and those below.

You are	Templates you can use	Templates you can edit	Employees you can pay
Group	All	All	Every company and Brand
Company	Group + your company + your Brands	Your company's and your Brands'	Your company and its Brands
Brand	Group + your company + your Brand	Your Brand's only (Company and Group templates are use-only)	Your Brand

"Made for": one template for several companies / Brands

NEW TEMPLATE
Open the "Made for" picker → TICK
Whole Group, a company (= all its Brands), or single Brands. Nothing is ticked to start with → RESULT
The template can be assigned to employees of any ticked company / Brand

You can only tick what is inside your own reach. Targets can be changed later, but not in a way that would leave an employee already on the template outside it. An extra item has one owner (Group, a company or a Brand) and can be given only to employees inside it.

1 · Salary templates

Each level can keep several templates (for example "Staff", "Managers", "Interns"). Every rate and switch below is editable per template; the defaults follow current Indian rules.

Part	Default	Notes
Basic	50% of CTC	
HRA	40% of Basic	
Special allowance	Balance	Whatever is left of gross after Basic, HRA and allowances
Employee deductions		
PF	12% of Basic	Counted on Basic up to ₹15,000 (cap can be switched off)
ESI	0.75% of gross	Only when gross is ₹21,000 or less
Professional Tax	By work state	State slabs (e.g. Karnataka ₹200, Maharashtra ₹175 / ₹200; Delhi none), or a fixed amount for all
LWF	Off	Fixed amount when on
TDS	Off	New tax regime, see below
Employer contributions (inside CTC, not paid to the employee)		
Employer PF	12% (8.33% pension + rest to PF)	On Basic up to ₹15,000
EDLI · PF admin	0.5% · 0.5%	On Basic up to ₹15,000
Gratuity	4.81% of Basic	
Employer ESI	3.25%	Only when gross is ₹21,000 or less
Other		
Sandwich rule	Off	Holidays / weekly offs between two full-day leaves count as leave (or LOP when no balance)

How CTC becomes in-hand

Example: monthly CTC ₹30,000, default template, employee in a state with no Professional Tax.

CTC	₹30,000
Employer PF 12% of ₹15,000	− ₹1,800
EDLI + PF admin (0.5% + 0.5%)	− ₹150

Gratuity 4.81% of Basic	− ₹722
Gross salary	**₹27,328**
Basic 50% of CTC	₹15,000
HRA 40% of Basic	₹6,000
Special allowance (balance)	₹6,328
Employee PF 12% of ₹15,000	− ₹1,800
ESI (gross above ₹21,000, so none) · PT (none in this state)	₹0
In-hand for a full month	**₹25,528**

TDS (income tax). New regime only. Each month the system projects the year's taxable salary (already paid this financial year + this month's rate for the months left), takes off the ₹75,000 standard deduction, applies the slabs and 4% cess, gives no tax up to ₹12 lakh taxable income (with marginal relief just above it), subtracts tax already deducted, and spreads the rest over the remaining months of April–March. Taxable bonuses add to that month's tax.

2 · Extra items

Items added on top of the template, made for the Group, a company or a Brand, each applying only to the employees chosen on it.

Allowance

Conveyance, food, etc. Fixed or % of Basic / Gross / CTC. Comes out of the Special allowance, so in-hand stays the same. Reduced by loss-of-pay days.

Deduction

Canteen, uniform, loan instalment, etc. Taken from in-hand.

Employer contribution

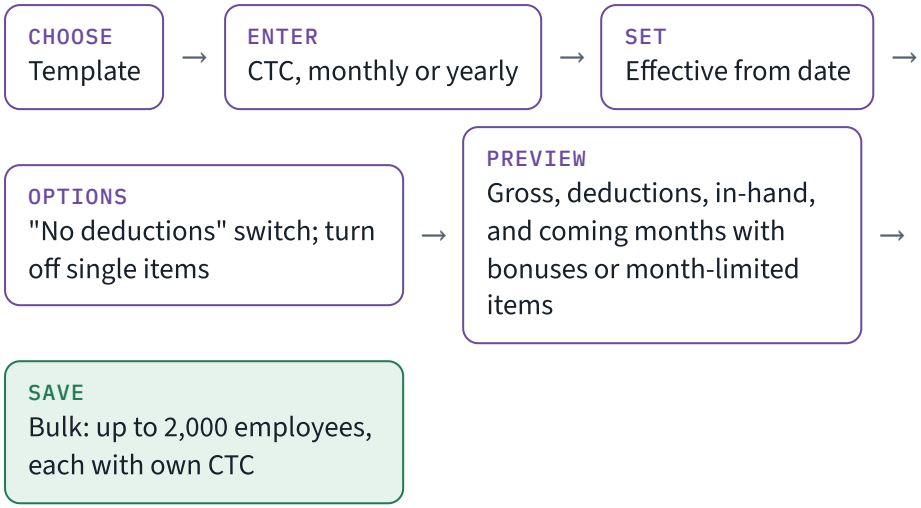

Any other employer cost inside CTC, like insurance.

Chosen months

Any item can apply every month or only in picked months, e.g. a Diwali allowance in October only.

3 · Assigning salary

Single or bulk

"No deductions" makes in-hand equal to CTC. A **revision** starts a new salary from its date and keeps the old one for earlier months; an **edit** corrects the current one. Salary given with a past date generates the missed months straight away.

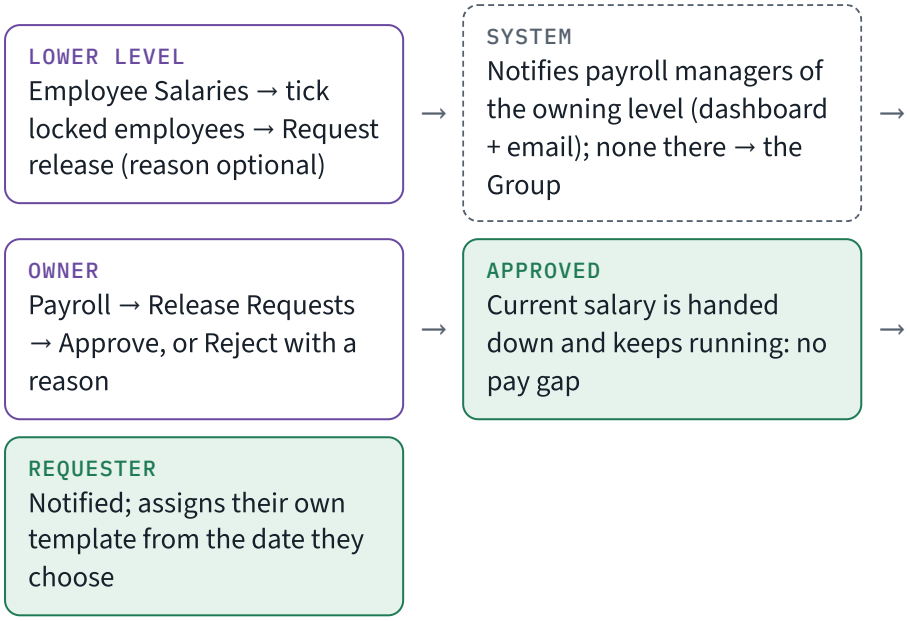

Whose salary is it? Locks and release requests

Every salary belongs to the level that assigned it. Only that level, or one above it, can give the employee a new salary, correct it or end it. This stops two levels from putting the same employee on two templates. All salaries assigned before 21 October 2026 belong to the Group.

Salary assigned by	Group can change	Company can change	Brand can change
Group	**Yes**	Locked	Locked
Company	**Yes**	**Yes**	Locked
Brand	**Yes**	**Yes**	**Yes**

A locked employee shows a lock and "Locked · Group" (or Company) in Employee Salaries and in the assign pickers; bulk assign skips them and says why. The "Managed by" column shows the owner of each salary.

Release request

A Brand's request on a company-owned salary can be decided by that Company or the Group. The requester can cancel while it is waiting. The owner can also release without a request: tick employees → "Release to their company / Brand" (Group to company or Brand; Company to Brand). Single assign shows the same "Request release" button for a locked employee.

4 · Monthly generation

A month is generated only after it is over, automatically every night just after midnight. Each day of the month is classed as:

Paid	Loss of pay (LOP)	Not paid, not LOP
Present, On Duty, half-day attendance	Unpaid leave (half-day = 0.5)	Days before joining
Paid leave	Working day with no attendance and no leave (absent)	Days after the last working day
Holidays and weekly offs	Sandwich day with no leave balance left	Days with no salary assigned
Sandwich day charged to leave		

Earnings are reduced in proportion to paid days. The template used is frozen for that month, so later template changes don't alter it.

5 · Review and share

MANAGER
Monthly Payroll → pick month, filter company / Brand

→

MANAGER
Open rows: paid days, LOP, breakdown

→

MANAGER
"Share with all" or select rows → Share

→

EMPLOYEE
Notified; sees breakdown and downloads PDF

Until shared, employees see nothing of that month. "Stop sharing" hides it again. Admins can cross-check with the Attendance Board export, which shows payable and LOP days and any difference against payroll.

6 · Bonuses and one-time pay

Types

Bonus, incentive, overtime, reimbursement, other.

Amount

Fixed, or % of that month's full Basic / Gross / CTC.

Bulk

Many employees and several months at once. Employees without a salary that month are skipped and listed.

How it's paid

In full on top of salary: no LOP cut, no PF/ESI/PT. Taxable ones count for TDS (reimbursements are non-taxable by default). Visible to the employee even before sharing.

7 · Corrections after a month is generated (arrears / recovery)

CHANGE
Leave, OD or regularisation approved / reverted, attendance fixed, bonus edited

→

SYSTEM
Recalculates that month (revision number goes up)

→

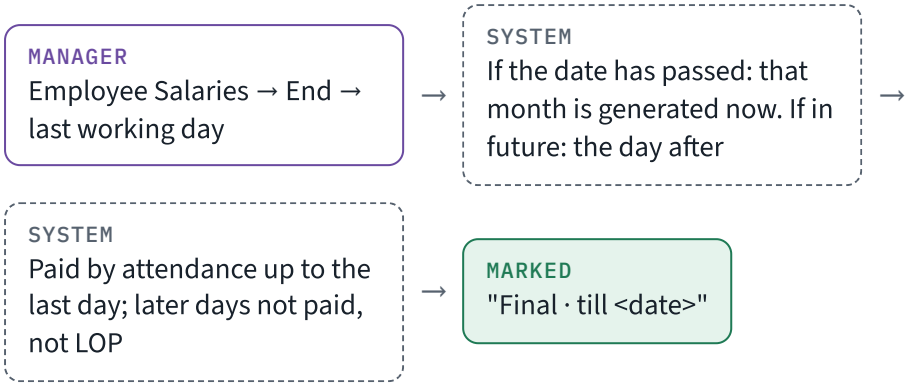

SYSTEM
Difference vs what was already paid

→

NEXT MONTH
Added as arrears, or recovered

The employee is notified when a shared month changes. Approvals are never blocked because payroll was already generated.

8 · Final settlement

Also applies automatically to an accepted resignation's last day. Refreshed for late punches on the last day. Leave encashment, gratuity payout and notice-period recovery are not calculated yet.

CHAPTER 11 · DELEGATION

Powers and who can give them

A power gives a regular employee one specific admin ability without making them an admin. Each power is given at one level, and nobody can give more than they hold themselves.

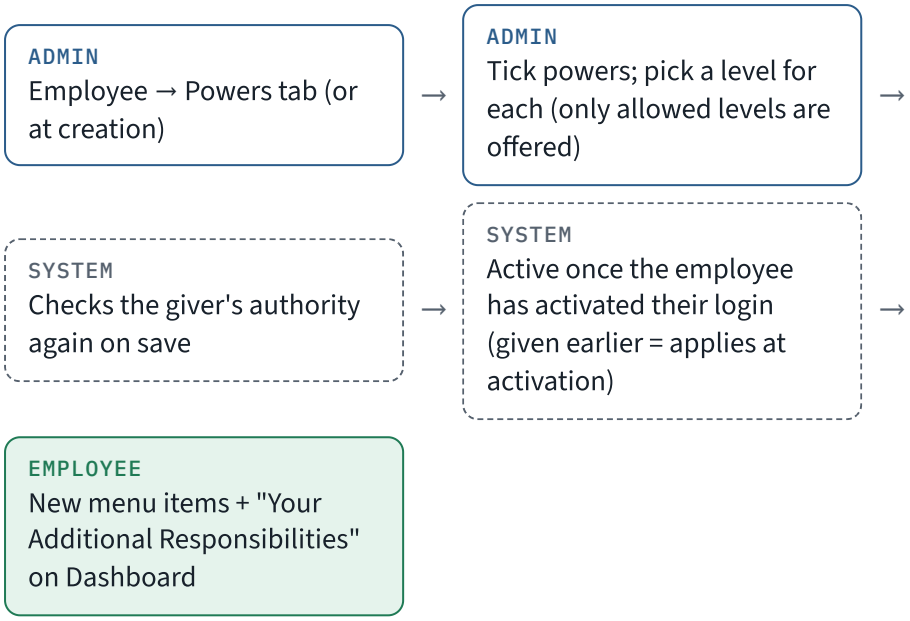

Power	What the employee can then do	Pages that appear	Levels
Create & Assign Roster	Create Rosters; create, edit and assign the Shifts, Holidays, Company Policies, Leave Types and Leave Policies that go in them	Roster, Shifts, Yearly Holidays, Company Policies, Leave Types, Leave Policy Settings	Brand · Company · Group
Approve Leave / OD / Comp-Off	Approve or reject these for everyone in reach, not only direct reports	Team Approvals → All employees	Brand · Company · Group
Document Verification	View any employee's documents and mark them verified	Document Verification	Brand · Company · Group
Assign Comp-Off	Credit a comp-off day directly (no approval needed); manage comp-off policies and enrol employees	Comp Off Setting	Brand · Company · Group
Attendance Records & Board	View and export everyone's attendance; correct day statuses	Attendance Records, Attendance Board	Brand · Company · Group
Manage Employees	Add employees, edit details and managers, change Department / Roster, send login invites. Cannot delete, cannot give powers	Employees	Brand · Company · Group
Assign Leaves	View and adjust leave balances	Employees → Leaves tab	Brand · Company · Group
Manage Payroll	Everything in Chapter 10, for the level given	Payroll	Brand · Company · Group

Level	Reach	How it's used
Brand	Only employees of the holder's own Brand	Pages show only that Brand
Company	Every Brand of the holder's company	Pages show the whole company
Group	Every company of the Group	Company Switcher in the top bar picks the company to work in; personal pages hide while acting for another company

Who can give which level

Giver	Brand	Company	Group	Condition
Super Admin	**Yes**	**Yes**	**Yes**	Any employee
Group Admin	**Yes**	**Yes**	**Yes**	Employees of their own Group
Company Admin	**Yes**	**Yes**	—	Only for powers whose abilities they hold company-wide
HR Manager	**Yes**	**Yes**	—	Same as Company Admin
Brand Admin	**Yes**	—	—	Only their own Brand's employees, only powers they hold
Employee holding a power	—	—	—	A power can never be used to give powers, even "Manage Employees"
Anyone acting in another company	—	—	—	Powers are given only from your own company

Giving a power

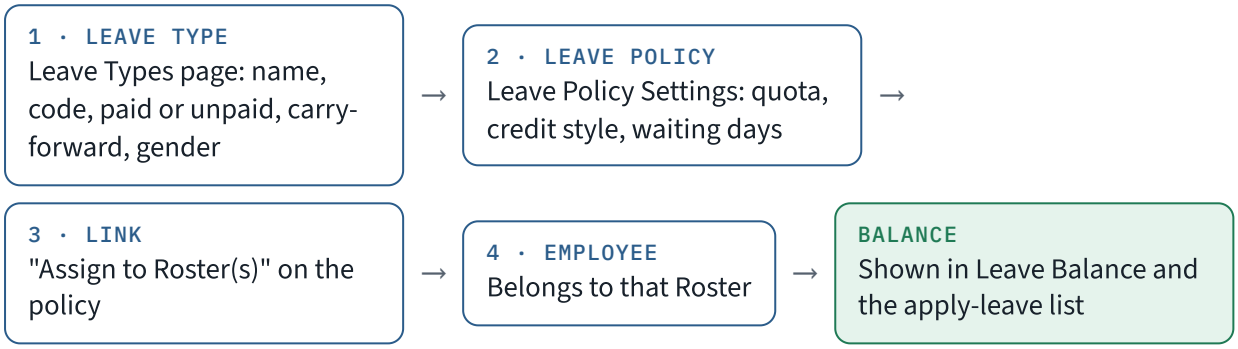

Untick to remove at any time; it stops working immediately. Powers are separate from being a manager: manager approvals for direct reports keep working with or without powers.

CHAPTER 12 · LEAVE SETUP

Leave Types, Leave Policies and balances

Leave is set up in two layers. A **Leave Type** says what kind of leave exists (Casual, Sick, Maternity…). A **Leave Policy** says how much of it a group of employees gets and how it is credited. The employee's Roster decides which policy applies to them.

How an employee ends up with a leave balance

One policy per leave type per Roster. A policy linked to no Roster is the company-wide default for that leave type. Leave Types and Policies can belong to one Brand or be shared by the whole company.

Leave Type settings

Setting	What it means	Example
Name and code	Shown to employees; the code is a short tag	Casual Leave · CL
Paid / unpaid	Unpaid leave can be taken with zero balance and is cut from salary as loss of pay	Leave Without Pay (LWP) = unpaid
Carry forward	Whether unused days move to the next period	On for Earned Leave
Max carry-forward days	The cap on what moves forward; empty means no cap	Up to 10 days
Applies to	All, or only one gender. Others never see it	Maternity = female
Deduct from another type	No balance of its own; each use is one date and takes 0.5 or 1 day from another type's balance. 0.5 = half-day leave with first or second half	Half Day CL takes 0.5 from CL
Default credit style	Pre-fills the policy form; each policy can still choose	Monthly

Leave Policy settings

Setting	What it means
Quota	Days per year (or per month for "monthly reset")
Unlimited	No limit and no balance check; days taken are still counted
Credit style: Yearly	The full year's quota is available from the start of the period
Credit style: Monthly	Quota ÷ 12 added on the 1st of every month
Credit style: Monthly reset	A fixed amount each month that does not add up; unused days lapse at month end, no carry forward
Usable after (days)	The employee can use this leave only after this many days from joining
Rosters	Which Rosters this policy applies to

Leave period

Confirmed staff: one period per yearly cycle (January–December by default; the start month is set on Leave Policy Settings, or per employee). Probation / Intern: one period from joining until confirmation.

Renewal

On the cycle start, a new period opens automatically: new allotment plus last period's remainder, capped by the carry-forward limit.

Joining mid-year

The first period's quota is prorated by days, rounded to half days.

Carry Forward balances

When a Roster change drops a leave type, its remainder moves to a "Carry Forward – <type>" balance the employee can still use.

Week Off Leaves

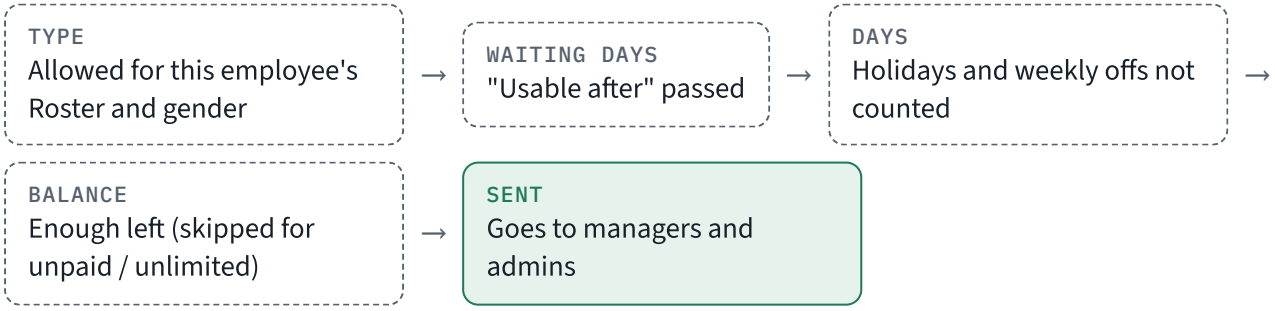

For a shift with no fixed weekly off: the admin turns it on for the Roster and picks basis days; each month the employee gets that many week-off days to take as single-day leave.

Manual adjustment

Admins (or "Assign Leaves" power holders): Employees → Leaves tab → add or reduce days. The employee is notified.

Leave Balance page (employee). For every leave type: *Assigned* (this period's allotment), *Carried Fwd*, *Used* and *Balance*. Linked types such as Half Day are listed too, showing which balance they draw from.

Leave request rules the system checks

Comp-Off, Week Off Leave and half-day linked types are single-day requests.

CHAPTER 13 · COMP-OFF

Comp-Off in detail

Comp-off is a day off earned by working on a day you would normally have off. It is opt-in: only employees enrolled in a comp-off policy earn it automatically.

Set up (admin, "Comp Off Setting" page)

1
Create a policy: name, Brand (or shared), expiry in days after earning

→

2
Select employees (filter by Brand / Department)

→

3
Assign the policy, or remove it to stop earning

Example: "Standard Comp-Off" with a 90-day expiry. A policy can't be deleted while employees are still enrolled. Credits already earned keep their own expiry.

Earning automatically

EMPLOYEE
Works on a holiday, weekly off, or approved Week Off Leave day

→

SYSTEM
Day becomes present (kiosk, approved OD, regularisation or admin correction)

→

SYSTEM
Creates a credit "pending approval"

→

APPROVERS
All managers must approve, or an admin decides

→

APPROVED
Credit is usable until its expiry date

If an employee had an approved Week Off Leave and still came in, that leave is given back automatically and the day earns comp-off instead.

Manual credit

An admin or "Assign Comp-Off" power holder credits a day to any employee. It is approved immediately.

Using it

Apply leave of type Comp-Off for one day. The oldest valid credit is used first.

Expiry

Checked every night. Expired credits can't be used; the employee is notified.

Revert

An admin can revoke an approved credit with a reason. A credit already used must have its leave reverted first.

Credit status	Meaning
Pending approval	Earned, waiting for managers / admin
Approved	Usable
Rejected	Not granted (reason shown)
Used	Spent on a Comp-Off leave
Expired	Not used in time
Revoked	Taken back by an admin after approval

CHAPTER 14 · CALENDAR AND RULES

Holidays, Shifts and Company Policies

Holidays

Name and date or date range. Linked to Rosters, so different offices can have different holidays. A holiday linked to no Roster applies to nobody.

Holiday reminder

At 9 AM on the day before a holiday, everyone in its Rosters gets a reminder (once per holiday, even if it spans several days).

Shifts

Start and end time and weekly off days. End before start = night shift (set automatically). Linked to Rosters.

No-Roster employees

Follow their default shift, or a flat 9-hour day if none.

Company Policies

Title, formatted text and an optional file (e.g. a PDF handbook). Linked to Rosters; employees read them in Self-Service.

Who changes them

Company Admin, HR Manager, Brand Admin (own Brand), and holders of the "Create & Assign Roster" power. Each change records who made it.

CHAPTER 15 · DOCUMENTS

Employee documents and verification

Aadhaar, PAN, certificates, offer letters and other files are kept on each employee's record. Allowed files: PDF, Word, PNG, JPEG.

Requesting a document from an employee

ADMIN / VERIFIER
Employee → Documents → Request: document type + note

→

SYSTEM
Employee notified; request shows on My Profile

→

EMPLOYEE
Uploads it in the Documents section

→

EMPLOYEE
Marks the request "Done"

→

CLOSED
Request fulfilled (or cancelled by the requester)

Verification

UPLOAD
By the employee or an admin

→

SYSTEM
Notifies verifiers (admins + "Document Verification" holders)

→

VERIFIER
Preview or download, then Verify or Reject with a reason

VERIFIED
Locked: can't be renamed or deleted. Employee notified. Shows who verified it and when.

REJECTED
Employee sees the reason, can correct the title or upload again.

CHAPTER 16 · EMPLOYEE LIFECYCLE

Employee lifecycle and account management

Employee status

ONBOARDING
Record created
→
ACTIVE
Working
→
ON NOTICE
Resignation accepted
→
EXITED
Left the company
→

ARCHIVED
Kept for records

Employment type	Notes
Full-time	Leave by yearly cycle
Part-time · Contract	Same leave handling as Full-time
Probation · Intern	Period in days or months, one leave period, queued Roster (Chapter 9)

Employee record

Name, code, contact, gender, date of joining, work state (for Professional Tax), Brand, Department, Designation, Roster, managers, HR, employment type, photo.

Managers

One primary and any number of extra managers, from any company of the Group. Picked Company / Brand first, then the person.

Profile photo

Employees can upload or remove their own photo; admins can too.

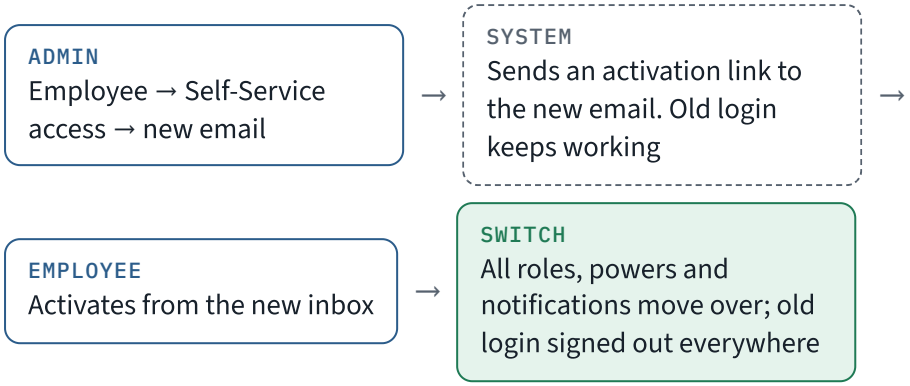

Department head

Each Department can name a head employee.

Deactivate (employee left, keep the record)

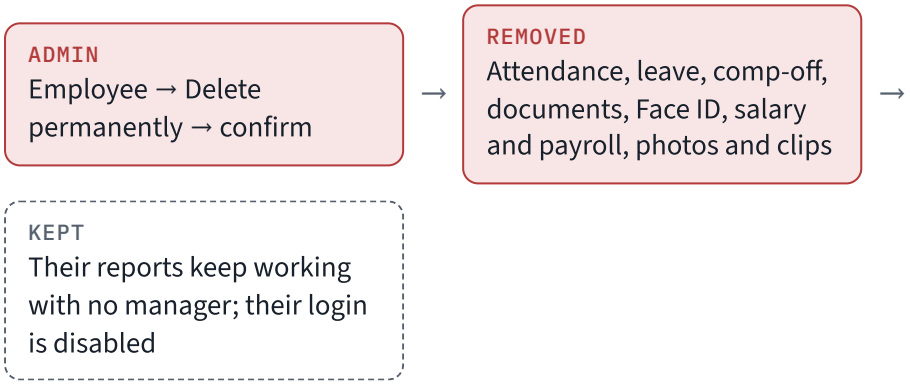

ADMIN
Employee → set Inactive
→
EFFECT
Self-Service login blocked immediately; history kept; can be reactivated

Changing an employee's login email

A mistyped email can't lock anyone out: nothing changes until the new inbox is confirmed. Leave, attendance and history stay with the employee.

Permanent delete (admins only, cannot be undone)

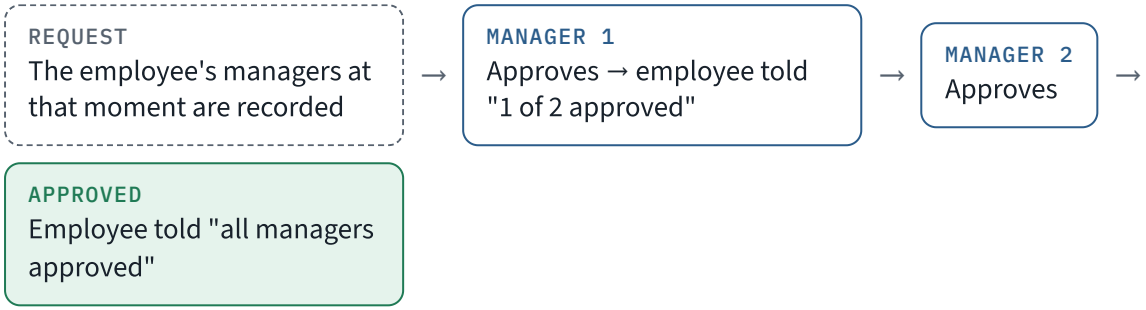

Use Deactivate for people who left. Permanent delete is meant for records created by mistake. The "Manage Employees" power never includes delete.

CHAPTER 17 · APPROVALS

Approval rules, history and revert

The same rules apply to Leave, OD and Comp-Off. Regularisation is decided by admins only.

Manager voting

ADMIN DECIDES

Company Admin, HR Manager, Brand Admin, Group Admin or an "Approve" power holder decides at once, without waiting for votes.

ANY REJECTION

One manager's rejection rejects the whole request. A reason is always required.

Request	Decided by	Cancel by employee	Revert by admin
Leave	All managers, or an admin	While pending	Yes: days go back to the balance, attendance restored
On Duty	All managers, or an admin	While pending	Yes
Comp-Off credit	All managers, or an admin	No	Yes, unless already used
Regularisation	Admins only	No	Yes: day goes back to before
Resignation	Assigned HR only	Withdraw while pending	No

History

The History icon on every row shows each step: submitted, each manager's vote, approved / rejected / reverted, who, when, and the reason.

Revert reason

Required. The employee is notified and the revert is in History.

Admin attendance change

Changing a day's status on top of an approved single-day leave reverts that leave first and refunds it. Multi-day leaves must be reverted separately.

Salary effect

Any approve or revert in an already-generated month recalculates it; the difference goes to next month.

CHAPTER 18 · REPORTS

Reports and exports

Attendance Records

One row per employee per day. Filter by date, Brand, Department, status, employee. Select rows → Change Status (Present / Half Day / Absent / a leave type). Watch the check-in / check-out clip.

Attendance Board

One month on one screen: employees down, days across, colour-coded status, with totals. Excel export.

Monthly Report: combined

Pick many employees and up to 12 months (any months, or "Whole year"). One report with attendance totals, leave balances and pay per employee. Excel export.

Monthly Report: detailed

Exactly one employee and one month: every day, every punch, leave taken, balances and salary breakdown.

Attendance Board Excel columns

Group	Columns
Employee	Employee Code, Name, Company and Brand (when more than one), Date of Joining, Last Working Day
Each day	Status code, Check-In / Check-Out, Hours Worked (shift hours in italics for On Duty / missed checkout)
Totals	Present Days, Half Days, Absent Days, On Duty Days, Leave Days, Holidays, Week Offs, Missed Checkouts, Total Hours
Payroll check	Days Counted, Payable Days, LOP Days, Paid Leave, Unpaid Leave, Sandwich LOP, Payroll Paid Days, Diff vs Payroll (red when not zero)
Notes	Status Code Legend and the dates that caused LOP, with the reason

Group Admin's "All Companies" export is split into "Company › Brand (N employees)" sections. Payroll money in reports is shown only to people who can view payroll for that employee.

CHAPTER 19 · SCREENS

Dashboards and main screens

Portal	Dashboard shows
Employee	Today's status, Leave Balance (days), Pending Requests, Upcoming Holiday, this month's summary; quick buttons for Apply Leave, Apply OD, Raise Regularisation, View Calendar, My Comp-Off, My Salary, Company Policies, Team Approvals; "Your Additional Responsibilities" if they hold powers
Brand Admin	Employees, pending Leave / OD / Regularisation / Comp-Off counts for their Brand; shortcuts to Organization, Shifts, Approvals
Company Admin / HR	Brands, Employees, pending Leave / OD / Regularisation counts; shortcuts to Organization, Shifts, Approvals
Group Admin	Companies, Employees, pending Leave / OD / Regularisation across the Group
Super Admin	Groups, Companies, Brands, Employees and Users across the platform

Group Admin → a company

Tabs: Employees (with Powers), Brands, Approvals, Company Policies.

Super Admin → Users

Every login on the platform with role, company and employee details; open one to see details and powers.

Super Admin → Group

Companies of the Group, Group Admin, and Attendance Kiosks with Signed-in Devices.

Login pop-up

At sign-in, anyone with probation periods ending (their own, their team's, or employees they manage) sees a list, soonest first.

CHAPTER 20 · NOTIFICATIONS

Every notification

All notifications appear under the bell. Clicking one opens the page it is about.
Items marked "+ email" are also emailed.

Event	Who receives it
New leave / OD request	Employee's managers + admins who can approve
New regularisation	Admins who can approve
Comp-off earned (pending)	Managers + admins who can approve
One manager approved, others pending	Employee
Request approved / rejected / reverted	Employee (reason shown on reject / revert)
Request cancelled by employee	Managers + approvers
Comp-off expired	Employee
Admin changed my attendance	Employee
Leave balance adjusted by hand	Employee
Holiday tomorrow	Employees of that holiday's Rosters (9 AM, day before)
Probation ending / ended	Employee, managers, admins who can edit them (daily from 3 days before)
Confirmed (probation over)	Employee, managers, admins
Resignation submitted / withdrawn	Assigned HR, managers, Company Admin / HR Manager / Brand Admin + email
Resignation accepted / rejected	Employee + email
HR assigned to a pending resignation	That HR
Document requested	Employee
New document uploaded	Verifiers
Document verified / rejected	Employee
Payslip shared	Employee

Event	Who receives it
Shared month recalculated	Employee
Salary release requested	Payroll managers of the level that owns the salary (Group if none) + email
Salary release approved / rejected	The person who asked + email
Invite / password reset	The person, by email only

CHAPTER 21 · RUNS ON ITS OWN

Automatic tasks

These happen without anyone clicking anything. If the server was off, the next run catches up.

When	What happens
Every 15 minutes	Payroll months waiting for recalculation are recalculated
Every hour	Open check-ins past 12 h 30 min are marked "Missed Checkout"
Daily, midnight	Comp-off credits past expiry become Expired (employee notified)
Daily, 00:05	Probation / Intern employees whose period ended and who have a queued Roster are confirmed and moved
Daily, 00:30	Last month's payroll generated for anyone missing it; final settlements processed
Daily, 2 AM	Kiosk check-in / check-out clips older than 90 days are deleted (the attendance itself stays)
Daily, 9 AM	Holiday reminders for tomorrow; probation reminders
1st of every month	Monthly leave credit, yearly renewals on the cycle month, monthly-reset leave refreshed, Week Off Leaves allotted
Right after changes	Payroll recalculation after approvals / corrections; probation check after saving an employee; past-month salary generated after a back-dated assignment

CHAPTER 22 · NOT BUILT YET

Coming next and current limits

These are planned or known gaps, so readers don't look for them in the software today.

Recruitment (ATS)

Job openings, candidates, interviews, offers.

Performance

Goals, reviews, appraisals.

Full exit settlement

Leave encashment, gratuity payout and notice-period recovery are not calculated in the final salary yet.

Old Tax Regime

Only the new regime is supported; no investment declarations (80C, 80D, HRA).

Tax filings

Form 16 and Form 24Q are not produced.

Billing / subscription

Plans and payments for external customers.

Kiosk security

The live check stops printed photos and photos on another screen, but not a pre-recorded video of the same person doing the exact challenge.

Single-device logout

"Logout" ends the session on that device's browser only; a password reset signs out every device.

Terms used in this guide

Term	Meaning
ESS	Employee Self-Service: the employee's own portal
Kiosk	A device at the office with a camera where employees mark attendance by face
Face ID	The employee's registered face, used to recognise them at the kiosk
Roster	A bundle of shift, holidays, policies and leave policy given to a set of employees
Queued Roster	The Roster a Probation / Intern employee moves to automatically when their period ends
OD	On Duty: working away from the office; counts as a worked day
Regularisation	A request to correct a missing or wrong punch
Comp-Off	A day off earned by working on a holiday or weekly off
Sandwich rule	Non-working days between two leaves also count as leave
LOP	Loss of Pay: days not paid (unpaid leave, absence)
LWP	Leave Without Pay: an unpaid leave type
CTC	Cost to Company: total yearly or monthly cost of an employee, including employer contributions
Gross	CTC minus employer contributions: the salary before deductions
In-hand / Net	What reaches the employee's account
PF · EPS · EDLI	Provident Fund, its pension part, and its insurance part
ESI	Employees' State Insurance, for gross salaries up to ₹21,000
PT · LWF · TDS	Professional Tax (by state), Labour Welfare Fund, income tax deducted at source
Arrears / recovery	Extra pay or deduction next month to correct an earlier month
Final settlement	The last salary, paid up to the last working day
Salary owner	The level (Group, Company or Brand) that assigned an employee's salary; only it or a level above can change it
Release request	A lower level asking the salary owner to hand an employee over

Term	Meaning
Power	A specific admin ability given to an employee at Brand, Company or Group level
Assigned HR	The person who decides one employee's resignation
Direct-mode company	A company with no Brands; employees sit directly under it

CHAPTER 24 · SUMMARY

Who can do what

"Own" means only their own records. "Brand" means only their Brand. Managers and power holders get extra rights as described above.

Feature	Employee	Brand Admin	Company Admin / HR	Group Admin	Super Admin
Create Groups, Companies, Brands	—	—	—	—	**Yes**
Kiosk accounts & devices	—	—	—	—	**Yes**
Departments, Designations, Shifts	—	**Yes**	**Yes**	View	—
Employees: add / edit / transfer	—	**Brand**	**Yes**	View · powers	Add · view
Rosters, Holidays, Leave setup, Policies	View own	**Brand**	**Yes**	View policies	Rosters
Approve leave / OD / regularisation / comp-off	**As manager**	**Brand**	**Yes**	**Any company**	—
Decide resignations	**As assigned HR**	View	View	—	—
Attendance Records & Board	**Own**	**Brand**	**Yes**	View · all companies	—
Monthly Report	—	**Brand**	**Yes**	**All companies**	—
Payroll: manage	—	**Brand**	**Company**	**Group**	—
Payroll: view	**Own, once shared**	**Brand**	**Company**	**Group**	—
Give powers	—	**Brand level**	**Brand / Company**	**Any level**	**Any level**
Mark attendance at kiosk	**Yes**	**If also an employee**	**If also an employee**	—	—

End of guide.
